Notes

Cuba UN- NY in 1994: 39; in 2005: 35.

*The World Bank reports Cuba's GDP at \$107 billion. See a more sober approach for GDP in 2014 by economist Pavel Vidal at <https://publications.iadb.org/es/publicacion/14056/que-lugar-ocupa-la-economia-cubana-en-la-region-una-medicion-la-tasa-ppa-de-las>.

Many economists believe that Cuba's actual GDP is much lower.

**Cuba's 2020 exports were 80% services of which 58% were in health (forced labor/exploitation).
